## TOP SUPPORTERS

“My children were elated when the grant packages came in the mail. None of us were expecting to receive so many wonderful, special items, along with the full amount for their activities. They both felt **very proud and special**. As their mother, I saw a change in the way they felt about their father being away. They were both struggling a bit missing their daddy, so the grants made them feel like they were **part of something truly special**. We are grateful for the donors and people who support this amazing program. Thank you!”
